# OUR SOLUTIONS

We are committed to collaborating with you, providing support in system design and piping specifications to ensure a smooth bid process. We look forward to becoming your go-to experts in vacuum-jacketed piping!

## FREE Training Sessions or Lunch & Learns

Learn about our products and services at your convenience. This no-cost service aims to foster collaboration and trust.

## Ongoing Training

We provide maintenance training to keep your skills sharp and our products top of mind.

## FREE Drawing Consulting & Mark-Up

Receive complimentary drawing reviews and mark-ups to ensure your designs are optimized for VJP applications.

## Resource Materials

Brochures, submittals, and modeling resources at your disposal.

**We address details early to reduce costly requests for information and design changes during the contractor bidding phase**

- Safety
- Accurate specs tailored to application
- Piping layout
- Components required
- P&ID's
- Guidance for scope responsibility (client, gas supplier, pipe vendor, contractor etc.)
- Pipe Sizing

**Together, let's enhance the design of cryogenic systems and ensure the success of your pharma projects!**
